

## HOW TO MAKE A SIMPLE

# Hay-den Mask

Begin with a paper plate. This is an example of a simple Scarecrow face...have as much fun as you can with his expression. Maybe give him some jolly cheeks.

With a very sharp knife, be careful to cut so that you can poke your nose through the nose-slot and see out from the eye-holes. (In a position like the red line above.)

With a Hole-Punch, make two holes either side of the mask.

Thread enough elastic to go around your head through the holes and tie the ends to the mask. Flip the elastic to the back of the mask.

Put it on.

***Have fun acting like a scarecrow!***
